# Patchwork appliqué using Bondaweb

1: Draw design on to paper side of Bonaweb

2: With glue side of Bondaweb against W.S. of fabric, lay strips of chosen fabrics over design.
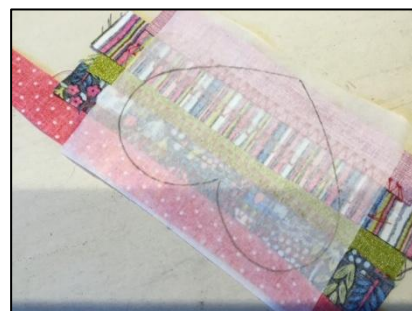

3: Cover with greaseproof paper to protect your iron . Iron Bondaweb into position using a hot iron.
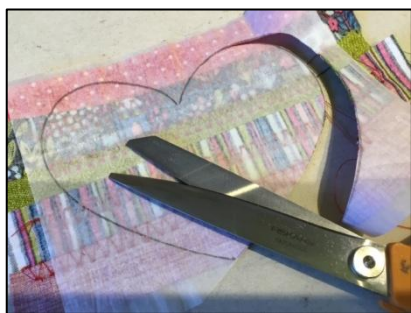

4: Carefully peel away the paper backing. The glue will hold the strips of fabric in place.

5: Select a decorative stitch or a wide zig-zag stitch to 'patchwork' the strips together.
Use contrast or different colour threads to add to the decorative effect.

6: Reposition the paper backing against the glue and secure into place with a warm iron

7: Cut around your design using sharp scissors to ensure a smooth, neat edge.

8: Peel away the paper backing.

9: Position as required & iron again to secure into place.
Complete by edging your design with a close zig-zag stitch
