

TEMPLATE FOR BREAD BASKET

Creating your templates:

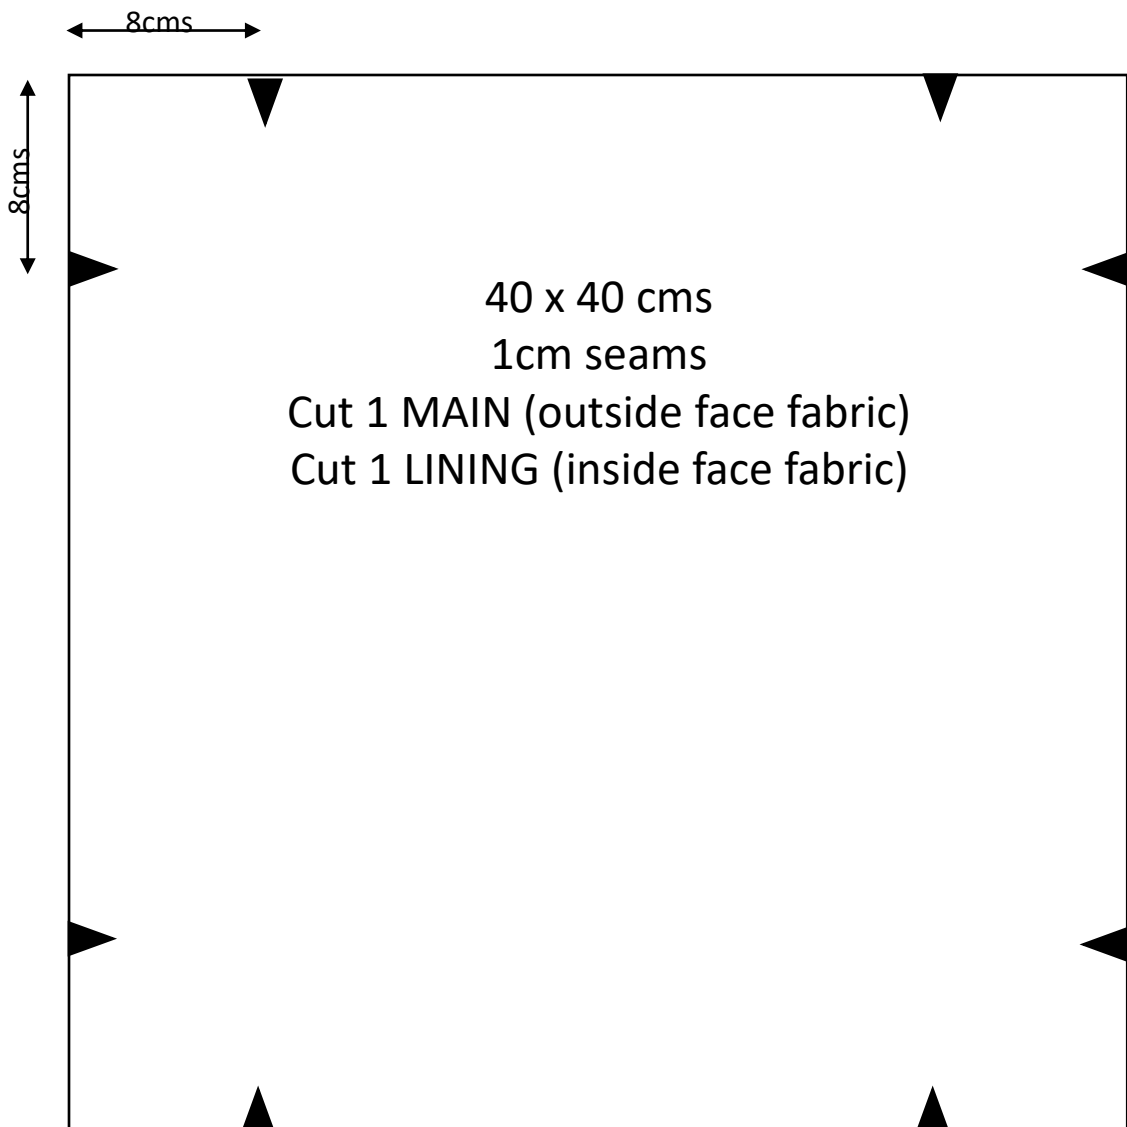

You will need to create your own templates for this workshop. The diagrams below show the template dimensions you will need to create for a finished basket measuring 24cms x 24cms x 7cms. If you require a smaller or larger basket please adjust the dimensions accordingly. As the template shapes are quite large using greaseproof paper, wallpaper or wrapping paper to create your templates will give you large piece of paper to work with. Wrapping paper with the grid lines printed on the back is particularly useful for keeping your shapes square.

To make the bread basket using my dimensions you will need:

Two coordinating fabrics 40cms x 40cms

38 x38cms of either fusible fleece, a medium interfacing or felt

2mtrs of 25mm bias binding or 10mm ribbon

INTERLINING

38 x 38 cms

**Cut 1 fusible fleece/medium
weight interfacing /felt**

STITCHING GUIDE 38 x 7 cms
